

## RINCON'S APPLIED CLIMATE SCIENCE SERVICES

rincon

**RINCON CONSULTANTS, INC.**

Environmental Scientists | Planners | Engineers

Rincon is an environmental and watershed science consulting firm that delivers planning, engineering, and environmental compliance services to Water industry clients. Rincon's **Applied Climate Science** team excels in climate action and adaptation planning and collaborative problem-solving for water agencies. **By helping our clients overcome climate risks and challenges, we further our mission of creating more sustainable and resilient communities.**

[www.rinconconsultants.com](http://www.rinconconsultants.com)

Rincon's **Applied Climate Science** team leads greenhouse gas (GHG) inventories, verifications, climate action plans, carbon reduction strategies, and climate adaptation and resilience plans, with growing emphasis on engagement of disadvantaged and vulnerable communities.

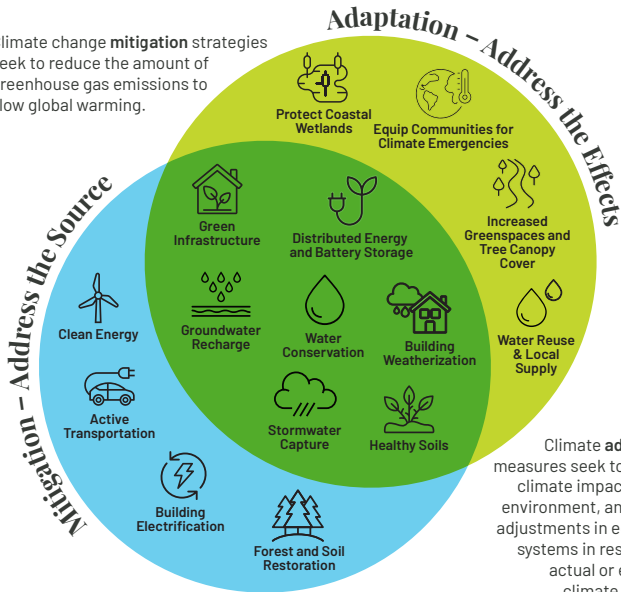

Resilient watersheds are better able to respond to and recover from the **impacts of climate risks** through implementation of adaptation strategies. These strategies are designed to mitigate impacts and take advantage of beneficial opportunities in response to the climate risks.

Our team has prepared over 50 Climate Action Plans and Climate Action/Adaptation Plans throughout California. To support plan implementation, we have developed a user-friendly cloud-based GHG Inventory and Monitoring and Reporting Tool, CAPDash.

## MITIGATION & ADAPTATION

Climate change **mitigation** strategies seek to reduce the amount of greenhouse gas emissions to slow global warming.

Climate **adaptation** measures seek to address climate impacts on the environment, and involve adjustments in ecological systems in response to actual or expected climate impacts.
