RINCON CONSULTANTS

Emergency Response

Planning, Permitting and Compliance

When disaster strikes, immediate action is critical. Rincon Consultants provides comprehensive emergency response services to help communities, agencies, and businesses navigate the aftermath of wildfires, floods, earthquakes, landslides, hazardous spills, and other natural and human-made disasters. With decades of experience, our multidisciplinary team delivers strategic planning, rapid mobilization, and compliance-driven solutions to restore operations and resilience.

- **Decades of Cross-Disciplinary** Disaster Recovery Experience
- **Trusted Partner** for Agencies at Local, State, and Federal Levels
- **Proven Track Record** in Wildfire, Flood, Hazardous Materials, and Infrastructure Recovery

Solutions Delivered

Wildfire Preparedness and Response

Comprehensive wildfire planning and hazard assessments help communities reduce risk, secure funding, and ensure regulatory compliance.

Fire Debris Cleanup and Post-Disaster Recovery

Streamlined recovery support provides debris removal compliance, soil certification, and guidance for safe and efficient rebuilding.

Flood and Storm Emergency Response

Emergency permitting, monitoring, and FEMA funding expertise restore critical infrastructure quickly after severe storms.

Emergency GIS and Data Support

Real-time mapping, modeling, and decision tools strengthen preparation, response, and long-term resilience.

Hazardous Material Spill Response

Rapid spill assessment, remediation, and monitoring services minimize environmental impacts while meeting regulatory standards.

Regulatory Permitting and Compliance

Expert permitting and compliance solutions safeguard projects with biological and cultural assessments and regulatory coordination.
